

# JATIS

## Revolutionizing aircraft maintenance planning with cutting - EDGE AI

Unlock unprecedented efficiency in aircraft maintenance planning, execution, and evaluation with JATIS, the ultimate AI-driven solution meticulously crafted by CSG exclusively for MRO facilities.

- Clarity & Flexibility
- Individual Settings
- Due Date Precision
- Robust Reporting
- Transparent Project Management

### User-Friendly Empowerment

Tailored for production maintenance leaders, JATIS allows intuitive intervention, enabling real-time adjustments based on unforeseen situations. Whether it's unexpected spare times or the unavailability of skilled technicians, the system recalibrates for optimal planning and execution.

### Autonomous Precision

JATIS pioneers fully autonomous planning, orchestrating optimal maintenance sequences by seamlessly integrating professional skills, equipment availability, shift schedules, and historical data. Anticipate additional work with surgical precision, empowering you to create precise budgets and streamline workflow processes.

### Smart Automation

JATIS is the epitome of smart automation, presenting all data in a visually intuitive format. Every task is meticulously automated and self-learning, ensuring unparalleled adaptability for future scenarios.

### JATIS isn't just a tool

It's your strategic partner in achieving the most efficient, fastest, and cost-saving solutions in aircraft maintenance. Elevate your operations with the power of JATIS - where innovation meets optimization.
